Join us as we celebrate the Grand Opening of the Fraternal Order of Eagles Diabetes Research Center with a special ceremony at the Coralville Marriott Hotel & Conference Center, located just minutes from the campus of the University of Iowa, on Saturday, August 23, at 11 a.m. CT.

After six years of hard work, we’re proud to gather in Iowa City to officially open the doors of the DRC and celebrate the hard work of all who made this achievement possible. The Coralville Marriott will be the site of the official opening ceremony featuring dignitaries from the F.O.E. and the University of Iowa as well as a special evening party with live music and a cash bar.

Guests will have the option before the ceremony to take a guided tour of the DRC, complete with photo opportunities and a chance to meet the men and women who will work within those walls each day to bring our dream of curing diabetes one step closer to reality.

Lodging is available for Aug. 22-23 at the Comfort Inn & Suites in Coralville (214 W 9th St., Coralville, IA 52241) at a special Eagles rate of $85 per-night by calling 319-337-8382 and mentioning the Eagles. Guests who wish to book their rooms for additional nights before or after Aug. 22-23, may do so at the discounted rate. The Comfort Inn is located down the street from the Marriott.

Colonial Beach Donates $5,000 to UVA Pancreatic Cancer Program

The Eagles of Colonial Beach #4315 paid tribute to one of their own with a special $5,000 grant presentation to the University of Virginia for pancreatic cancer research.

Annually on the third Saturday of July, Colonial Beach is host to an array of musicians that entertain members, guests and patrons who contribute financially to support cancer research. Year after year, people come and share their stories as a survivor, supporter of a family member or simply just to be People Helping People.

This year was different. Colonial Beach lost one of its own, Tommy Johnson, to pancreatic cancer. When his fiancée and long-time companion Sheila Massey participated in the 2013 benefit, Tommy’s passing was fresh in her mind. “Why can’t some of the money from our benefit go to pancreatic cancer? It’s such an unknown cancer and so many people are in need,” she asked.

The Eagles contacted State Officers to inquire about a grant to benefit research in that area. The University of Virginia was contacted after weeks of research and in September, the university opened a major clinical trial that may lead to the first early detection scan for pancreatic cancer. The university continues to make new discoveries believed to advance the treatment of pancreatic cancer and extend the life expectancy of those with the disease.

Eagles can find out more on the UVA Pancreatic Cancer Research Program by contacting Interim Director of Cancer Programs Jocelyn Lewis at 494-342-9675, or at jocelynlewis@virginia.edu.
